

Two for One – Combined Mobile & Hosted Voice

With **TruConverged**, you get two lines of services at a monthly cost lower than the average cell phone bill. **TruConverged** includes one **TruVoice** line and one **TruMobile** line with unlimited local and long distance on the desk phone and unlimited nationwide talk and text on the mobile phone. Plus you get all the benefits of our industry leading **Private Cellular Network**.

Break the Silo – Converged Desktop & Mobile

Business today are forced to manage two silo'd modes of communications – the desk phone and mobile phone. Employees publish two telephone numbers, manage two Voicemails and multiple contact lists. This leads to **communications chaos** - missed calls, missed voicemails and lower productivity. With **TruMobility's** native mobile integration employees have one phone number, one voicemail and call move seamlessly between the mobile and desk phone. The "**native**" means that the integration is in the cloud and employees don't have to use a 3rd party smartphone app to make and or receive phone calls.

Private Cellular Network

TruConverged includes our flagship **Private Cellular Network** (PCN). The **PCN** is your own private cellular base station installed in your office. The **PCN** emits full bar signal strength so you will never lose another call in the office. While on the **PCN** all mobile **data** is free, and does not count against your shared data plan.

Ultimate Flexibility – Bring Your Own Broadband

TruVoice offers the ultimate in flexibility. You can bring you own approved broadband connection or use **TruMobility's** nationwide MPLS over DSL, T1 or greater. **TruVoice** can accommodate most broadband connections including 4G wireless.

TruAccess Portal

With **TruAccess Portal** you are in control. Our **TruAccess Portal** gives you immediate access to the features and call control for both the desk and mobile phone. Add a Voicemail, change call routing or change find-me/follow-me all online. Need to re-route a phone number – do it with one click.
