

Hosted PBX - End-to-End Enterprise Voice Solution

Why pay thousands for an on premise phone system that is cumbersome to install and painful to manage. More and more small businesses are moving to a hosted voice solution based on the ease of use, scalability, rich feature set and favorable economics. With **TruVoice**, you get an enterprise class phone system for a low fixed monthly cost.

No Big Upfront Expenditures

With **TruVoice** you are no longer dependent on premise-based hardware at the core of your voice communications. With **TruVoice**, you eliminate the upfront and ongoing expense of purchasing and maintaining a PBX.

Ultimate Flexibility – Bring your own

TruVoice offers the ultimate in flexibility. You can bring your own approved broadband connection or use **TruMobility's** nationwide MPLS over DSL, T1 or greater. **TruVoice** can accommodate most broadband connections including 4G wireless.

TruVoice Portal

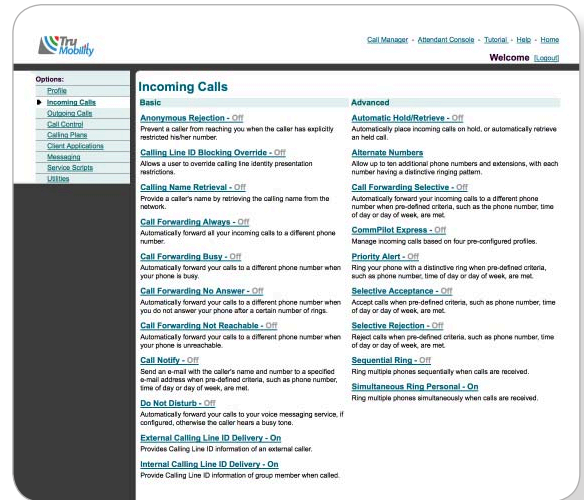

With **TruVoice** you are in control. Our **TruVoice** portal gives you immediate access to the features and call control for each individual employee. Add a Voicemail, change call routing or change find-me/follow-me all online. Hire a new employee? Activate or deactivate new employees with the click of the mouse.

Highly Scalable

New employees? Activate new users with a "click". With **TruVoice**, you can scale employees by simply plugging in a new phone.

Nationwide Availability

TruVoice service is available with number portability virtually everywhere in the US.
